

Kevinn Ramirez

Junior Cloud Engineer · AWS Certified Cloud Practitioner · Tokyo, Japan · Open to remote

admin@kevinramirez.com · Portfolio: kevinramirez.com · github.com/Kevinnra · linkedin.com/in/kevinramirez

SUMMARY

AWS Certified Cloud Practitioner with three production-grade projects deployed on AWS, covering serverless, containerized, and IaC-driven architectures. Shipped a static website (S3, CloudFront), a serverless REST API (Lambda, API Gateway, SAM), and a containerized Flask API on ECS Fargate with RDS PostgreSQL, ALB, VPC, and OIDC CI/CD. Pursuing AWS Solutions Architect Associate (SAA-C03) and Cisco CCNA.

CLOUD ENGINEERING PROJECTS

Portfolio Website — AWS Infrastructure & CI/CD · github.com/Kevinnra/Kevinnra.github.io 2025 – Present

- Deployed serverless website hosting on S3, CloudFront, and Route 53 — 99.99% availability, sub-second global load times, ~\$0.56/month operational cost
- Automated CI/CD with GitHub Actions; file-diff detection selectively invalidates CloudFront cache on every push to main, reducing API call costs

Stack: AWS S3 · CloudFront · Route 53 · IAM · GitHub Actions · HTML/CSS/JS

Serverless Contact Form API · github.com/Kevinnra/Serverless-Contact-Form-API 2025 – Present

- Built a serverless REST API integrating 6 AWS services — \$0.00/month on Free Tier, under 300ms response time, powering the live portfolio contact form
- Defined the entire stack in AWS SAM (CloudFormation) with one-command deploy, automated end-to-end via GitHub Actions CI/CD

Stack: Lambda (Python 3.13) · API Gateway · DynamoDB · SES · CloudWatch · SNS · AWS SAM

Containerized Flask REST API — ECS Fargate · github.com/Kevinnra/flask-ecs-api 2025 – Present

- Deployed a containerized Flask REST API on ECS Fargate with RDS PostgreSQL, ALB, and a custom VPC; database tier isolated in private subnets with NAT Gateway egress
- Implemented GitHub Actions OIDC pipeline automating Docker image builds to ECR and zero-downtime ECS deployments; credentials managed via Secrets Manager — no static AWS keys stored

Stack: Docker · ECR · ECS Fargate · RDS (PostgreSQL) · ALB · VPC · Secrets Manager · GitHub Actions OIDC

TECHNICAL SKILLS

AWS: S3 · CloudFront · Route 53 · Lambda · API Gateway · DynamoDB · SES · CloudWatch · SNS · IAM · CloudFormation · ECR · ECS Fargate · RDS · ALB · VPC · Secrets Manager

IaC & CI/CD: AWS SAM · CloudFormation · GitHub Actions · GitHub Actions OIDC · Git **Containers:** Docker · ECR · ECS Fargate

Scripting: Python · Bash · JavaScript

Monitoring: CloudWatch Logs & Alarms · SNS **Databases:** DynamoDB · PostgreSQL (RDS) **OS:** Linux (Ubuntu) · macOS

Networking: TCP/IP · DNS · HTTP/HTTPS · VPC · Subnets · Security Groups · NAT Gateway **Security:** IAM least-privilege · Secrets Manager · OIDC · input validation · rate limiting

Languages: English (Professional) · Spanish (Native) · Japanese (Basic — N5)

CERTIFICATIONS

AWS Certified Cloud Practitioner (CLF-C02) · Amazon Web Services January 2026

CS50P — Introduction to Programming with Python · Harvard / edX January 2025

EXPERIENCE

Uber Eats — Delivery Partner · Tokyo, Japan July 2024 – Present

Maintained 5-star rating across 1,000+ deliveries; independent operations, real-time problem solving, customer communication under pressure
